To solve a Sudoku puzzle, place a number into each box so that each row across, each column down, and each small square within the larger diagram (there are 9 of these) will contain every number from 1 through 9. In other words, no number will appear more than once in any row, column, or smaller square. Working with the numbers already given as a guide, complete each diagram with the missing numbers that will lead to the correct solution. Find the answers on page 9

TESTIMONIAL

We've been running an ad in the Lake County Shopping Guide since we opened in 2014.

We are consistently pleased with the exposure and return on this very reasonably priced ad space. Print ads with any decent distribution usually cost an arm and a leg, but Maria keeps the prices affordable and keeps our customers coming back. Thank You! Tim O'Meara

Testimonial

I am amazed at the response I've been getting from the ads in the Lake County Shopping Guide. I received 10-15 calls without any special discount offers the first 6 weeks the paper was out. I've gotten at least 12 jobs from the last ad I ran. This paper works for me. *Very affordable rates.*
