	2		8		6	4	3	
	8	4	9		2		1	
1			5				4	6
				2			9	
			4				7	2

To solve a Sudoku puzzle, place a number into each box so that each row across, each column down, and each small square within the larger diagram (there are 9 of these) will contain every number from 1 through 9.

Hard

	6	8	7					
		9			5			
	5	3		9				
7			2	4				9
		4				1		
	9			3	1			7
				1		9	8	
			9			2		
					7	4	6	

In other words, no number will appear more than once in any row, column, or smaller square. Working with the numbers already given as a guide, complete each diagram with the missing numbers that will lead to the correct solution. Find the answers on page 11
